

Advocacy meeting on Importance of Hospital Delivery & Save the Girl Child

In rural areas some people prefers delivery of baby in their residence, due to which MMR and IMR is still alarming. On the other hand, Son preference in Indian society is an age old phenomenon. So female foeticide and negligence of girl child is also common in Indian family. In view to reduce MMR and IMR and also to change mindset of common people towards girl child, the Commission organize Advocacy Meeting in collaboration with National Health Mission (NHM), Tripura, on Importance of Hospital Delivery & Save the Girl Child in those areas where rate of home delivery is high.
